

Optina  
DIAGNOSTICS

### **Optina Diagnostics Inc. Company Bio**

At Optina, our vision is to Transform the diagnostic world by seeing the unseen.

Optina harnesses the power of innovative retinal imaging and AI to provide accessible, non-invasive diagnostic test results for silent and under-detected diseases, empowering healthcare providers and patients with meaningful information.

Optina has received FDA Breakthrough Device Designation in 2019 for its first indication in Brain Health as well as FDA 510(k) clearance for its fundus, Optina-4C™, camera.

With a first application in the early diagnosis of Alzheimer's disease Optina challenges the status quo by providing a diagnostic Retinal Deep Phenotyping™ platform to understand the age-related sources of memory loss, empowering millions of patients.
