

Dr. Hitoshi Hirata | Designated Professor, Department of Personalized Medical Technology at Nagoya University School of Medicine

Dr. Hitoshi Hirata is a designated professor of the Department of Personalized Medical Technology at Nagoya University School of Medicine. His specialization lies in peripheral nerve surgery and functional reconstructive surgery. He served as a professor in the Department of Hand Surgery from 2007 to 2022. During this tenure, he actively fostered collaborative research between the fields of medicine and engineering, along with fostering partnerships between academia and industry. Starting in 2015, he concurrently held a professorship at the Innovative Research Center for Preventive Medical Engineering. In this capacity, he contributed to the diverse development of innovative medical technologies. Dr. Hirata has been in his current position since April 2022.
