

Dr. Shingo Shimoda | Designated Professor at Nagoya University, Graduate School of Medicine

Dr. Shingo Shimoda holds the position of Designated Professor at Nagoya University, Graduate School of Medicine. His exploration of space robotics has led him to a profound recognition of the imperative for versatile intelligent systems, critical for harmonious human-robot coexistence. He is actively involved in crafting adaptive intelligent systems tailored for uncharted environments, drawing inspiration from biological control principles. His ultimate goal is to leverage this advanced intelligent system in the realm of rehabilitation
