

Jack W. Moorman, BS, MS

ジャック モーマン

Co-Founder, US-Japan Medtech Frontiers

Chairman, U.S. - Japan Healthcare Council

Visiting Faculty Member, Graduate School of Medicine, Osaka University, Japan

Partner, Nichibeï Advisors, LLC

Jack provides advisory services to companies and organizations, primarily early-stage ventures in the field of healthcare. He is also co-founder of US-Japan Medtech Frontiers, a nonprofit organization which recently joined with the Japan Society of Northern California (JSNC).

With an undergraduate degree in Engineering from the University of Illinois, Jack initially worked in the semiconductor industry. Jack was the first employee sponsored by Intel to attend the Masters Sloan Program at the Stanford University Business School. He has held a number of senior management positions including: Director of Engineering at Fairchild Test Systems; President of Nanometrics, a public company; and CEO of Microbar, a turn-around. He has been a co-founder of six start-ups including medical device companies Cardiac Mariners and Vivant Medical and has fourteen issued U.S. patents.
