

LarmorBIO | Rodolfo Rohr, Co-founder & CEO

Rodolfo Rohr is co-founder and CEO of LarmorBIO, an early stage Massachusetts Institute of Technology (MIT) spin-off pioneering a new class of AI based magnetic resonance technology for rapid, live, cellular oxidative stress measurements. It's long term vision is to enable precision medicine at scale. Mr. Rohr is an electrical engineer and entrepreneur with 15+ years of C-level roles in life sciences and medical devices, including at Interactive Motion Technologies.
